One Way Airconditioning

High Performance Airconditioning

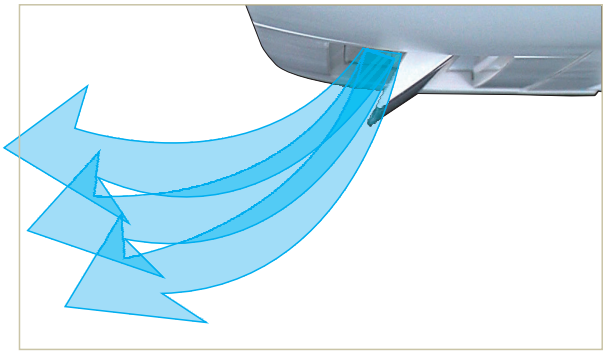
High energy efficiency with latest technology

Aerodynamic Impeller Design

CFD (computational fluid dynamics), used in blade shape design of jet engines, has been applied to the design of air channels in the impeller of the air conditioners to develop the ideal air channels system for air movement. The air flow of the jets created in this system enables a large volume of air to be blown with minimum power consumption, yet the air flow is uniform, quiet and reaches points a long distance from the blower. With CFD used in the design of the impeller, produces an even laminar airflow to ensure the highest air flow & air throw at the lowest noise levels.

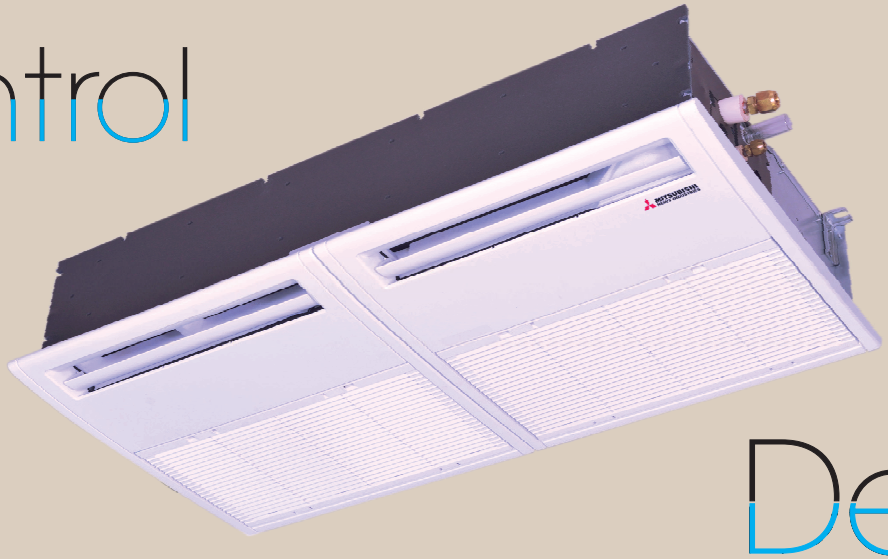
Aerodynamic Vane Design

Improved Technology for quieter Operation
Our new design aerodynamic vane blade & Super Turbo Fan Can achieve low noise by reducing the pressure fluctuation in the indoor unit.



Futuristic

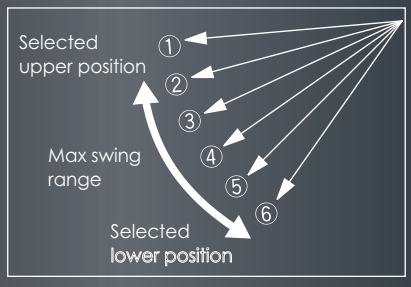
Control



Design

Individual flap control system

Two directions of air flow can be controlled individually by flap control system. The flap can swing within the range of upper and lower flap position selected with Wired remote control.



*The wireless remote control is not applicable to the individual flap control system.

Wireless remote control

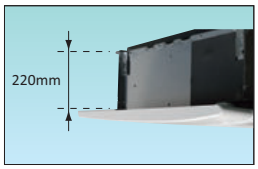
Infrared Receiver Panel

RCN-TS-E2

For wireless remote control simply attach an additional panel with infrared receiver on the right side of the main decorative panel.

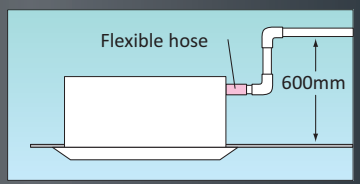
Compact design

Indoor unit size (W:1,150 x D:565) brings easy installation for 1,200 x 600 ceiling and Panel size (1,250 x 650) is suitable for 1,200 x 600 ceiling. Height is the industry's lowest height level 220mm and weight is 27/28kg only.



600mm Drain Pump

Drain can be discharged upward by 600mm from the ceiling surface close to the indoor unit.
It allows a piping layout with a high degree of freedom depending on the installation location.



Futuristic

Hi-POWER (POWERFUL COOLING)
Use the high power (powerful cooling) function to quickly reach the optimum temperature level when you first turn on the unit this function I will operate for a maximum of 15 minutes before returning to a normal operation

COMFORT

Automatic Operation
This function automatically selects the required cooling function based on the current room conditions.

AIRFLOW

Individual Flap Control System
Two directions of air flow can be controlled individually by flap control system. The flap can swing within the range of upper and lower flap position selected with Wired remote control.

Vertical Auto Swing
The vertical louvers on your unit will move up and down continuously during operation. This function allows you to set the up/down swing position of the louver to your preferred operation angle.

CONVENIENT

Air Filter
The air filter in the unit traps and removes airborne dust particles and other allergens to provide you with a clean air.

Function Switch
From the seven available functions on the unit, this function allows you to set two functions to operate automatically.

Fresh Air Intake Provision
This function provides clean fresh air into the room through the external air intake, avoiding the constant recycling of internal air.

SERVICE FUNCTION

Self Diagnostics
The internal microcomputer automatically runs a diagnostic of the system in the event of a malfunction. This enables your authorised dealer to isolate and repair any issues.

Built in Drain Pump
The built-in drain pump, allows greater flexibility with installation, offering a great solution for applications with limited space.

ECONOMY MODE

ENERGY SAVING MODE
Temperature is set to optimize to save energy without losing comfort.

SILENT OPERATION

This function allows you to program periods where the unit will operate with reduced noise levels, perfect for night time and an uninterrupted sleep.

Comfort

Automatic Fan Speed
The unit's on-board microcomputer continuously monitors the room's air temperature and adjusts the air flow automatically.

Filter Clean Indicator
This warning alerts you as to when the filter needs to be cleaned.

Favorite setting
Operation mode, set temperature, fan speed and air flow direction automatically adjust to the programmed favourite setting.

TIMER

Sleep Timer
This function allows you to set a pre-determined amount of time between 30 and 240 minutes that your unit will operate before switching off.

Improved Serviceability
The fan unit (comprised of impeller and motor) is easily accessible from either the side or bottom of the unit and can be slide out for easy maintenance.

DC PAM Inverter Twin Rotary Compressor
DC PAM Inverter Twin Rotary Compressor which performs high efficiency operation under the wide range capacity variance from low 10% to high 120% of its nominal capacities using DC PAM Technology . Besides low vibration & low sound level, high efficiency is achieved by the optimization of mechanical parts dimension and by the application of high power Neodymium motor.

Compressor Protection With AI

Indoor Units

When using RC-EX3A (Remote control), functions with symbol ● are available.
However, for RC-E5 (Remote control), functions ✱ with are not available.

Hi-Power	Hi-Power (Powerful Cooling)	Use the high power (powerful cooling) function to quickly reach the optimum temperature level when you first turn on the unit this function I will operate for a maximum of 15 minutes before returning to a normal operation	●
Economy	Economy Mode	**ENERGY SAVING MODE** Temperature is set to optimized to save energy without losing comfort.	●
Comfort	Automatic Operation	This function automatically selects the required cooling function based on the current room conditions.	●
Comfort	Motion sensor (optional)✱	This sensor detects human activity and shifts the temperature setting according to the amount of activity in the room.	● Optional
Air flow	Individual Flap Control	Two directions of air flow can be controlled individually by flap control system. The flap can swing within the range of upper and lower flap position selected with Wired remote control.	●
Air flow	Silent Operation	This function allows you to program periods where the unit will operate with reduced noise levels, perfect for night time and an uninterrupted sleep.	●
Air flow	Vertical Auto Swing	The vertical louvers on your unit will move up and down continuously during operation. This function allows you to set the up/down swing position of the louver to your preferred operation angle.	●
Air flow	Automatic Fan Speed	The unit's on-board microcomputer continuously monitors the room's air temperature and adjusts the air flow automatically.	●
Timer	Sleep Timer	This function allows you to set a pre-determined amount of time between 30 and 240 minutes that your unit will operate before switching off.	●
Timer	Weekly Timer	Set your unit to turn on and off automatically on a weekly basis to suit your usual room usage on each day.	●
Convenient	Function Switch ✱	From the seven available functions on the unit, this function allows you to set two functions to operate automatically.	●
Convenient	Favorite setting ✱	Operation mode, set temperature, fan speed and air flow direction automatically adjust to the programmed favorite setting.	●
Convenient	Select the language ✱	Set the language to be displayed on the remote control.	●
Convenient	Air Filter	The air filter in the unit traps and removes airborne dust particles and other allergens to provide you with a clean air.	●
Convenient	Filter Clean Indicator	This warning alerts you as to when the filter needs to be cleaned.	●
Convenient	Outside Air Intake	This function provides clean fresh air into the room through the external air intake, avoiding the constant recycling of internal air.	●
Others	Self Diagnostics	The internal microcomputer automatically runs a diagnostic of the system in the event of a malfunction. This enables your authorised dealer to isolate and repair any issues.	●
Others	Built in Drain Pump	The built-in drain pump, allows greater flexibility with installation, offering a great solution for applications with limited space.	●
Others	Improved Serviceability	The fan unit (comprised of impeller and motor) is easily accessible from either the side or bottom of the unit and can be slid out for easy maintenance.
